

PRODUCT REQUIREMENTS DOCUMENT (PRD)

Product Name: JobHustles Recruiting Platform

1. Product Overview

JobHustles Recruiting Platform is a web-based recruitment ecosystem designed to connect job seekers (applicants) with employers across multiple industries. The platform consists of two main interfaces:

1. **Site Portal (Frontend Platform)** – used by applicants and employers
2. **Admin Portal (Backend Management System)** – used by internal administrators

The system is designed to streamline hiring, simplify job applications, and enable intelligent candidate-job matching beyond traditional application processes.

2. Objectives

- Enable job seekers to easily find and apply for jobs
 - Allow users to build professional CVs directly on the platform
 - Provide employers with a structured and scalable hiring solution
 - Create an additional revenue stream via subscriptions and job credits
 - Allow administrators to actively match candidates with jobs
 - Support recruitment across multiple industries without restriction
-

3. Target Users

3.1 Applicants (Job Seekers)

- Students and graduates
- Skilled and unskilled workers
- Professionals seeking new opportunities

3.2 Employers

- Small businesses
- Medium and large enterprises
- Recruitment agencies

3.3 Admin

- Internal JobHustles team managing operations
-

4. Core Features

4.1 Site Portal (Applicant & Employer Interface)

4.1.1 User Registration & Authentication

- Applicants can sign up using email/phone
- Employers can register their company accounts
- Secure login and password management

4.1.2 Applicant Features
